

## Cost Engineer - Powertrain - Valladolid relocation

**Workplace:** 47002, Valladolid

[Apply online!](#)

### What to expect:

- Build and maintain in-house competitive costing capabilities:
- Develop Competitive Costing Process and Tools.
- Collect necessary data for Costing, using internal and external teardown information.
- Identify cost drivers, material choices, manufacturing processes, and sourcing strategies used by competitors.
- Maintain a database of benchmarked cost data for use in ongoing and future projects.
- Realize Costing assessments
- For powertrain at large, including engines, transmissions, batteries and other systems
- Formalize detailed should costs analyses and gap analyses
- Collaborate and Communicate
- Coordinate with internal costing engineers to develop consistent tools and practices.
- Work closely with engineering, procurement, and finance teams to validate benchmarking assumptions and ensure data accuracy.
- Prepare detailed reports and presentations summarizing findings, cost differentials, and strategic recommendations for management and engineering teams.

### What you bring along:

- Bachelor's or Master's degree in Engineering, or a related field
- Minimum 7 years of experience in powertrain costing within the automotive industry
- Experience with cost benchmarking, teardown analysis, and competitive intelligence in the automotive sector.
- Knowledge of Costing Software, including preferably Siemens Costing SW.
- Strong analytical skills and proficiency with cost modelling tools and techniques.
- Ability to interpret technical and financial data from diverse sources
- Excellent communication and presentation skills for conveying complex benchmarking findings.
- Project management experience.
- Knowledge of the latest trends in automotive powertrain.
- Fluency in English. Fluency in Spanish and/or French, to effectively communicate in our diverse work environment.

We are Bertrandt: an independent, international development service provider with long years of automotive expertise.

We create technological solutions for our customers at any stage of the product development process with a focus on hot topics such as digitalization, e-mobility and autonomous systems, largely for the automotive, aerospace and mechanical engineering sectors.

Our goal: accelerating technological progress. We work on this every day – with around 12,000 employees at over 50 sites worldwide.
