DevOps Engineer (CI/CD, Cloud & Kubernetes)

Workplace: 418 32, Gothenburg

Apply online!

What to expect:

- Build, maintain and optimize CI/CD services and pipelines using tools such as Gerrit, Jenkins, Artifactory, SonarQube and in-house applications.
- Work with cloud infrastructure (Azure and AWS) and ensure reliable and scalable DevOps solutions.
- Develop automation, scripting and tooling using Python, C#, Terraform or similar technologies.
- Contribute to GitOps workflows and improve operational efficiency across multiple teams.
- Monitor, troubleshoot and analyze system performance across infrastructure and software layers.
- Support product teams with expert knowledge of CI/CD, cloud systems, build systems and infrastructure orchestration.
- Ensure strong documentation and self-service solutions for internal development teams.
- Collaborate closely with engineering teams across the organization to drive modern DevOps practices.

What you bring along:

- Master's degree in Computer Science, Computer Engineering or equivalent.
- Strong experience building scalable CI/CD systems and services.
- Proficiency with cloud platforms (Azure and AWS).
- Hands-on experience with Kubernetes, Docker and orchestration systems.
- Good understanding of Git and GitOps workflows.
- Strong Linux competence and experience in troubleshooting distributed systems.
- Background in scripting and programming (Python, C#, Terraform or similar).
- Experience implementing monitoring, logging and alerting solutions (Prometheus, Grafana, ELK, etc.)
- Interest in software security principles and secure DevOps ecosystems.
- Excellent communication, collaboration and problem-solving abilities.
- Fluency in English (spoken and written).
- Gothenburg location and candidates must hold valid work authorization in Sweden.
