

Systems Engineer for Aerospace & Defence (m/f/d)

Workplace: 85077, Manching

Apply online!

What to expect:

- Systems Engineering (MBSE): Model systems using tools such as SysML, and CAMEO.
- Requirement Specification: Define and manage low-level requirements using tools like DOORS.
- System Analysis: Analyze systems to identify components and system architecture.
- Project Monitoring: supervise project milestones such as flight plans, plan and track product lifecycle and project milestones, and analyze data and prepare improvement reports

What you bring along:

- Educated to University degree level in Aeronautical/Industrial Engineering or a related discipline.
- At least 2 years of related professional experience in Systems Engineering, preferably within aerospace or defense projects.
- Experience with UML, SysML, DOORS, and modeling tools like CAMEO or Rapsody will be highly valued.
- Experience with Jira for ticket management and Confluence for knowledge sharing will be highly valued.
- Personal Skills: Strong analytical abilities, attention to detail, and excellent organizational skills.
- Languages: English (fluent spoken and written)

We are Bertrandt.

An independent and international development service provider with long years of expertise. With cross-industry know-how and a holistic understanding of systems and products, we create technological solutions at any stage of the product development process. We deal with a focus on hot topics such as digitalization, e-mobility and autonomous systems, mainly for the automotive, aerospace, defence and mechanical engineering sectors, and consistently facilitate the development of tailored solutions in these areas. Our goal: to accelerate technological progress and make a relevant contribution to a sustainable future. We work on this every day – with around 12,000 employees at more than 50 sites worldwide.

Severely disabled persons or persons with equivalent status within the meaning of SGB IX are given preference if they are equally qualifie
