C++ Software Developer - Automotive for Embedded Systems

Workplace: 10000, Rabat

What to expect:

- You create software concepts, developments and integrations for the automotive industry
- You will be responsible for AUTOSAR-compliant codes in the basic software or in application layers
- You develop drivers and software for current and next-generation vehicles in compliance with ISO 26262
- You implement new algorithms within a Scrum team in close cooperation with function developers
- You will be involved in the initialization of the processor and the communication between different control units
What you bring along:

- You have a degree in mechatronics, electrical engineering, information technology or a comparable course of study
- You have initial professional experience in a relevant field
- Your programming skills in C++, Python, are good
- You have knowledge of bus systems such as CAN, Ethernet etc. and Robot Operating System (ROS)
- You enjoy working in a team and are communicative
- You have high demands on software quality
- You speak good English (German is nice to have)

With more than 50 facilities in Europe, the Bertrandt Group has been providing development solutions for the international automotive and aircraft industry since 1974. Every day, more than 15 000 employees guarantee extensive know - how and support our client (Manufacturer and OEM) with management, design and industrialization solutions.

Bertrandt Technologie Morocco offers you opportunities in the automotive sector (body in white, interior and exterior, layout, powertrain, and electronics). Moreover, we are also present in interdisciplinary field such as project management, quality management, supply chain/industrialization and validations.
