

# Test Automation Engineer (m/w/d)

**Arbeitsort:** 40212, Düsseldorf

Jetzt online bewerben!

## Was Sie erwartet:

### • Your Role as Test Automation Engineer

As a Test Automation Engineer, you will play a key role in ensuring the reliability and quality of TEAMS. You will collaborate closely with developers and stakeholders throughout the product lifecycle, applying both manual and automated testing approaches to validate functionality, performance, and security.

### Key Responsibilities

- Design and implement robust test strategies and methodologies
- Execute functional and non-functional tests across software and hardware components
- Develop and maintain automated test scripts
- Collaborate with cross-functional teams to define and uphold quality standards
- Perform root cause analysis and regression testing
- Ensure compliance with industry regulations and security standards
- Stay current with emerging testing tools,

## Was Sie mitbringen:

### • What You Bring

- 3+ years of experience in testing or QA roles
- Strong understanding of test types: regression, black-box, white-box, UAT
- Proficiency in Java, Python, and JavaScript for test automation
- Experience with tools such as Selenium, WebdriverIO, Appium, Postman, or RestAssured
- Understanding of CI/CD processes (GitLab, Jenkins, Docker)
- Experience with TDD/BDD frameworks
- Familiarity with API testing and microservices
- Knowledge of security testing (OWASP, penetration testing)
- Exposure to RPA tools is a plus
- Bachelor's degree in Computer Science, Software Engineering, or a related field

technologies, and best practices
