

# Automotive Systems & Software Engineer - ADAS / Body / Infotainment M/F

Lieu de travail: 78140, Vélizy-Villacoublay

Postulez maintenant!

## Vos missions et votre environnement:

As part of cutting-edge automotive programs (ADAS, in-vehicle computing, infotainment), we are looking for experienced engineers to support leading automotive manufacturers and suppliers **in Japan**.

You will work in a high-performance international environment and contribute to developments that are shaping the future of advanced mobility.

Vous évoluerez dans un environnement international exigeant et participerez à des développements au cœur des technologies de mobilité avancée.

## We are recruiting for several areas of expertise :

### Systems & Software

- Systems and software architecture
- Embedded software development
- Software integration and validation
- DevOps and CI/CD
- Project management
- Vehicle testing and application engineering

### Data

## Vos compétences et connaissances:

### Required Profile

- Degree from an engineering school or equivalent
- Solid hands-on experience in embedded systems, ideally within the automotive industry
- **Fluency in Japanese and English** is essential in a multicultural, client-facing environment
- Strong communication skills and proven ability to work effectively in cross-functional teams
- Technical curiosity, strong analytical mindset, and motivation to take on complex engineering challenges.

### Environnement

- Highly technical programs involving **ADAS, ECUs, digital cockpits**, and next-generation in-vehicle systems
- International and multicultural environment, working closely with global engineering teams
- Agile working methods (scrum, feature teams)
- Cross-disciplinary collaboration across **software, systems, data, and validation**.

Ready to take on a major technological challenge in Japan

- Data Science
- Data Engineering
- Data Analysis

? Advance your career while contributing to cutting-edge automotive innovation.

Don't wait, apply now !

### System Domains

- ADAS (driver assistance and automation)
- Body systems (vehicle functions and body electronics)
- Infotainment / digital cockpit and in-vehicle computing

**Assignment localisation : Japan**

### Why join us? ?

The Bertrandt Group is a leading technology partner to the automotive, aerospace, energy, and medical technology industries. With 50 years of experience, a strong international footprint, and highly skilled experts, Bertrandt drives the future of Industry 4.0 by leveraging key technological trends such as digitalisation, autonomous systems, connectivity, and electric mobility.

### **Bertrandt offers :**

- The assurance of a varied and exciting career path, tailored to employees' aspirations,
- A good work-life balance thanks to flexible working hours and remote working,
- A salary commensurate with your profile,
- Choosing a responsible employer that supports its employees' wellbeing, including pension, disability and workplace accident insurance,
- Developing your skills through the Bertrandt Academy.

**Choosing Bertrandt means taking control of your future!**

### Déroulement des entretiens

Interview Process
