

## Aerospace / Industrial Engineer - Aerospace field

**Workplace:** 28909, Getafe

[Apply online!](#)

### What to expect:

We are looking for a **Junior LSA Engineer** for an opportunity within Aerospace - Defence field. The role involves maintaining and updating the **Logistic Support Analysis (LSA)** database and related documentation of the aircrafts, ensuring alignment with industry standards and supporting technical publications when required.

### Key Responsibilities:

- Review of maintenance tasks in accordance with **S3000L** and **MIL-STD-1388** standards
- Cross-checking **Data Modules** against the LSA database
- Implementation of **Document Requirement Lists (DRLs)** for new Part Numbers in the LSA system
- Participation in client meetings to resolve issues related to database updates and change implementation
- Execution of **Maintenance Task Analysis (MTA)** using technical drawings and project documentation

### What you bring along:

- Educated to University degree level Aeronautical/Industrial/Mechanical Engineering, TMA or a related discipline.
- Previous experience within Aerospace field will be valued.
- Ability to adapt to shifting workloads and collaborate with various teams
- Strong organizational and communication skills.
- English: Intermediate level or higher (written and spoken).

- Reporting task progress to support deliverable tracking with the customer
- Estimating workload based on project needs
- Documenting processes and activities

### **We are Bertrandt.**

An independent and international development service provider with long years of automotive expertise. With cross-industry know-how and a holistic understanding of systems and products, we create technological solutions at any stage of the product development process. We deal with a focus on hot topics such as digitalization, e-mobility and autonomous systems, mainly for the automotive, aerospace and mechanical engineering sectors, and consistently facilitate the development of tailored solutions in these areas. Our goal: to accelerate technological progress and make a relevant contribution to a sustainable future. We work on this every day - with around 14,000 employees at more than 50 sites worldwide.
