

Equipment implementation specialist

Workplace: 418 32, Gothenburg

[Apply online!](#)

What to expect:

- Ensure EHS (Environment, Health, Safety) compliance and sustainability for equipment over time.
- Provide second-line analysis support for problem-solving activities.
- Actively participate in competence networks and share best practices across teams.
- Support the Local Area Leader in finance-related tasks (e.g., budget analysis, TSU).
- Develop equipment solutions considering geometry requirements, process needs, and program KPIs.
- Review and validate equipment FMEA (Failure Mode and Effects Analysis).
- Conduct virtual and/or physical verification of equipment.
- Plan and oversee installation and delivery of equipment.
- Lead commissioning activities, including issue follow-up and control.
- Ensure supplier documentation meets client standards and manage delivery.
- Provide input to lessons learned for continuous improvement.
- Facilitate handover of equipment to end users.

What you bring along:

- Degree in **Mechanical/Manufacturing Engineering**
- Experience with **complex and unique machinery** or related field.
- Strong knowledge of **EHS standards** and compliance.
- Proficiency in **FMEA review and analysis**.
- Hands-on experience with **equipment installation, commissioning, and verification**.
- Ability to work collaboratively across teams and share best practices.
- Analytical skills for **budget analysis and financial support tasks**.
- Excellent documentation and reporting skills.

With more than 54 locations throughout Europe, the Bertrandt Group has been providing engineering and development solutions for the international automotive and aerospace industries since 1974. More than 12,000 employees use their know-how and innovative strength every day to support our customers – leading manufacturers and OEMs – with integrated solutions in management, design, and industrialization.

Bertrandt is now expanding into Sweden, establishing a strong and future-oriented presence in Gothenburg.

Our activities cover a spectrum of expertise from electrical, electronics, and software development to design engineering, project management, quality, industrialization, and validation, all driven by innovation and a passion for technology.

Gothenburg location and candidates must hold valid work authorization in Sweden.
