

Lead Engineer - HW Integration - Digital Key

Workplace: 418 32, Gothenburg

Apply online!

What to expect:

- The team that you will work with are responsible for the hardware development of our Digital key solution and surrounding interface components.
- Your team is managing the development at the suppliers to ensure our requirements; time plans are met also considering cost efficiency. You will primarily be working on next gen digital key hardware.
- As a Lead Engineer you will continuously work with securing the deliveries for Volvo Cars production and aftermarket.
- A key responsibility is to compile the technical requirements from the various stakeholders and make sure that the supplier has accepted the scope for the development. Later in the development review the test and validations results together with the supplier.
- You are the project leader in the team that consist of several HW Engineers and SW Responsible and of cause the suppliers that we work closely with. You are responsible for the time plan and for planning the activities and collaborate with our different internal interfaces (attributes, mechanical integration, SW development etc.) and external suppliers.

What you bring along:

- We are seeking candidates, with product development experience from automotive industry, who exhibit flexibility, self-drive, reliability, and strong teamwork skills. We want to build self-organizing empowered teams that act proactively, that take responsibility for their deliveries and always strive to build a great product for the end customer.
- You probably have a B.Sc. or M.Sc. degree in Electronics, Computer science, Automation or equivalent with relevant experience.
- Having worked within the automotive industry with diagnostics, integration of software, software testing or managing/owning electronic components for release to production or similar is meritorious.
- Having an interest in our products and components, and a drive to learn and develop are very important qualifications.
- You like to meet people and support the roll-out of our new technology. You are engaged with a curious, open-minded and positive approach. You like structure and have things organized and well planned.
- Fluency in English is mandatory.

With more than 54 locations throughout Europe, the Bertrandt Group has been providing engineering and development solutions for the international automotive and aerospace industries since 1974. More than 12,000 employees use their know-how and innovative strength every day to support our customers – leading manufacturers and OEMs – with integrated solutions in management, design, and industrialization.

Bertrandt is now expanding into Sweden, establishing a strong and future-oriented presence in Gothenburg.

Our activities cover a spectrum of expertise from electrical, electronics, and software development to design engineering, project management, quality, industrialization, and validation, all driven by innovation and a passion for technology.

Gothenburg location and candidates must hold valid work authorization in Sweden.
