Application Engineer (m/f/d)

Arbeitsort: 80907, Munich

Was Sie erwartet:

As Application Engineer (m/f/d) for a SOC ATE system you are primarily responsible to support installed base customers with following main responsibilities:

- Provide application development support of SOC test systems to customers.
- Initiate and develop test methodologies and solutions for customer's SOC devices
- Develop test program and design hardware interface for SOC devices
- Optimize test program to reduce test time and increase fault coverage
- Solve engineering and production problems for customers
- Document all projects and intellectual knowledge
- Communicate with customers to ensure services delivered meet their requirements
- Collaborate with colleagues from application development team, division, field personnel for project implementation
- This role may require frequent travel in Europe and occasional travel to the Far East or the USA.

Was Sie mitbringen:

- University Degree in Electronic Engineering
- **3-5 years' relevant experience in semiconductor test business**
- **Proven experience in digital, mixed signal and RF test development and debug using ATE platforms like Advantest V93000**
- Demonstrated experience with Java or C++ programming language
- Basic knowledge in operating systems (Linux in general)
- Hardware design load board / probe card (preferred)
- Good communication and presentation skills for internal as well as for customer facing activities
- Demonstrated troubleshooting skills
- Ability and motivation to work in project teams in a global environment
- Ability to work with minimum supervision and to work under pressure
- Fluent English (mandatory) and German (preferred) language skills
