

Systems Engineer

Lugar de trabajo: 28906, Getafe

iAplica online!

We are looking for a Systems Engineer to join our team, supporting a project focused on the mission control system of an aircraft, particularly in the area of video and lighting systems.

You will work within the Design Office, contributing to the definition and implementation of new electronic devices (such as cameras, monitors, or similar systems), understanding qualification requirements related to interfaces and video, and supporting system-level activities such as specification, V&V planning, System Interface Documents (SID), Technical Requirement Specifications (TRS), and documentation review from providers.

This position is **on-site** in Getafe (Madrid).

General Responsibilities:

- Support the definition, specification, and implementation of new electronic devices (cameras, monitors, etc.).
- Understand and apply qualification requirements related to interfaces and video systems.
- Analyze and understand system-level implementations and interfaces.
- Participate in V&V planning and documentation activities (SID, TRS).

What you bring along:

- University degree in Electronic Engineering or a related field.
- Minimum 2 years of experience in system development or production.
- Experience in system-level specification and V&V.
- Knowledge of video equipment, imaging systems, or electronic devices.
- Proactive attitude and strong communication and analytical skills.
- English level B2 or higher.

- Perform testing and review provider documentation.
- Collaborate with internal and external teams to ensure system compliance and integration.

We are Bertrandt.

An independent and international development service provider with long years of automotive expertise. With cross-industry know-how and a holistic understanding of systems and products, we create technological solutions at any stage of the product development process. We deal with a focus on hot topics such as digitalization, e-mobility and autonomous systems, mainly for the automotive, aerospace and mechanical engineering sectors, and consistently facilitate the development of tailored solutions in these areas. Our goal: to accelerate technological progress and make a relevant contribution to a sustainable future. We work on this every day - with around 14,000 employees at more than 50 sites worldwide.
