

Logistic Support Analysis Engineer/PMA Junior Engineer

Workplace: 28906, Getafe

Apply online!

What to expect:

We are searching for a PMA Maintenance Technician to join one of our projects within the aerospace sector, supporting the SIRTAP program. The selected candidate will be responsible for maintaining and updating the logistic support plan for the two aircraft in the program, ensuring alignment with standards, documentation, and customer requirements. The role involves coordination with LSA teams, technical documentation review, and participation in internal and customer meetings.

General responsibilities:

- Maintain and update the logistic support plan for the SIRTAP aircraft.
- Review maintenance tasks in accordance with S3000L and MIL-STD-1388 standards.
- Validate Data Modules against the LSA database.
- Define aircraft maintenance tasks based on supplier/customer documentation and project metrics.
- Participate in customer meetings to resolve issues related to changes in the LSA database.

What you bring along:

Degree in Aerospace, Industrial, Mechanical Engineering or similar (recent graduates are welcome).

- Ability to collaborate in PMA activities and Technical Publications depending on workload.
- Willingness to support internal projects such as safety tasks or new ILS activities (e.g., Philobot).
- Strong analytical mindset and attention to detail.
- Good communication skills and ability to work with multidisciplinary teams.
- Motivation to grow within a technical and logistics-oriented environment.

What we offer:

- Flexible working hours to support your work-life balance.
- Competitive compensation package.
- Continuous training and professional development opportunities.
- A collaborative and team-oriented work environment.
- Regular employee events to connect and celebrate

- Perform Maintenance Task Analysis (MTA) using project drawings and documentation.
- Report completed tasks for deliverable tracking with the customer.
- Estimate workload and support planning activities.
- Document tasks, processes, and updates as required.

achievements.

If you are a motivated engineer looking to start your career in the aerospace sector, we encourage you to apply. We are waiting for you!

We are Bertrandt.

An independent and international development service provider with long-standing expertise in the automotive and aerospace industries. With cross-industry know-how and a holistic understanding of systems and products, we create technological solutions at any stage of the product development process. We focus on key innovation areas such as digitalization, e-mobility and autonomous systems, supporting the automotive, aerospace and mechanical engineering sectors. Our mission is to accelerate technological progress and contribute meaningfully to a sustainable future. Every day, more than 14,000 employees at over 50 sites worldwide work toward this goal.
