

Mechanical Design Powertrain Intern

Workplace: 1000, Rabat

Apply online!

What to expect:

- As a Development Engineer (m/f/d), your main responsibilities will include:
 - Developing innovative concepts for the powertrain systems of the future.
 - Designing components and assemblies for electric and hybrid powertrains with a focus on manufacturability.
 - Conducting complex package and installation space analyses.
 - Preparing and presenting work results through technical drawings, CAD models, and design documentation.

What you bring along:

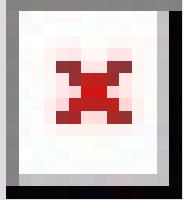

- To successfully meet these exciting challenges, you bring the following technical and personal qualifications:
 - Proficient use of one of the common CAD tools (CATIA V5, Creo, Siemens NX) and MS Office.
 - Initial experience in the development of powertrain components as well as in project management.
 - Ideally, specific knowledge in the field of electric motors, high-voltage batteries, combustion engines, or their peripherals.
 - Strong problem-solving skills and assertiveness when dealing with interface partners.
 - Excellent communication skills and confident demeanor.
 - Independent, structured, and responsible working style.

With more than 50 facilities in Europe, the Bertrandt Group has been providing development solutions for the international automotive and aircraft industry since 1974. Every day, more than 13 000 employees guarantee extensive know - how and support our client (Manufacturer and OEM) with management, design and industrialization solutions.

Bertrandt Technologie Morocco offers you opportunities in the automotive sector (body in white, interior and exterior, layout, powertrain, and electronics). Moreover, we are also present in interdisciplinary field such as project management,

quality management, supply chain/industrialization and validations.
