

## Aerospace Engineer (CAMO)

**Workplace:** 28906, Getafe

**Apply online!**

### What to expect:

We are searching for a CAMO Specialist to join one of our projects within a major aerospace client, supporting the A330MRTT fleet. The role combines AMP-related activities with fleet planning responsibilities, ensuring continuous airworthiness, documentation accuracy, and maintenance compliance across all aircraft. You will collaborate closely with multiple departments to maintain operational readiness and support the planning and execution of maintenance tasks. The position is based at the client's facilities (on-site presence required).

### Main responsibilities:

- Collaborate with the AMP department to manage Airworthiness Directives (ADs), Job Cards (JCs), and scheduled line maintenance tasks (Pre-flight, Daily, Weekly, Post-flight, and Transit checks).
- Update and maintain Line Check Job Cards, ensuring accuracy, traceability, and compliance with operational and regulatory requirements.
- Coordinate with Maintenance Planners to manage tasks across the fleet, including aircraft undergoing conversion or retrofit.
- Support the full planning cycle: task scheduling, Job

### What you bring along:

- Background in Aeronautical Engineering, Aircraft Maintenance, or CAMO/MRO operations.
- Knowledge of AMP, MPD/MMPD, HTI, AD/SB processes, and Job Card documentation.
- Experience with maintenance planning tools and documentation systems.
- Strong analytical mindset and attention to detail.
- Ability to work effectively with multidisciplinary teams.
- Intermediate or advanced English level.

### What we offer:

- Flexible working hours to support your work-life balance.
- Competitive compensation package.
- Continuous training and professional development opportunities.
- A collaborative and team-oriented work environment.

If you are a motivated professional looking for your next challenge in the aerospace sector, we encourage you to apply. We are waiting for you!

Card creation and editing, and follow-up of maintenance compliance

-Ensure smooth coordination with engineering, planning, and maintenance teams to maintain aircraft availability and airworthiness.

### **We are Bertrandt.**

An independent and international development service provider with long years of automotive expertise. With cross-industry know-how and a holistic understanding of systems and products, we create technological solutions at any stage of the product development process. We deal with a focus on hot topics such as digitalization, e-mobility and autonomous systems, mainly for the automotive, aerospace and mechanical engineering sectors, and consistently facilitate the development of tailored solutions in these areas. Our goal: to accelerate technological progress and make a relevant contribution to a sustainable future. We work on this every day – with around 14,000 employees at more than 50 sites worldwide.
