

Tooling Project Manager

Workplace: 040103, Bucharest

[Apply online!](#)

What to expect:

- Manage tooling projects end-to-end and ensure delivery within agreed quality, cost, and schedule (QCD) targets.
- Act as the primary on-site point of contact for the customer, representing the team's expertise and know-how.
- Collect and analyze technical input data to define scope and deliverables.
- Prepare cost estimates for engineering studies and/or manufacturing.
- Respond precisely to specifications and align solutions with stated needs.
- Launch and steer the manufacturing phase: run supplier consultations (RFQs) and track execution.
- Provide ongoing technical and commercial follow-up throughout the project lifecycle.
- Guarantee the quality of deliverables and oversee the manufacturing process, intervening on-site as needed.
- Produce regular progress reports and dashboards for management.
- Be accountable for meeting all Quality, Cost, and Schedule commitments.

What you bring along:

- Bachelor's degree in Mechanical Engineering (or equivalent).
- 3+ years of relevant experience in tooling and/or special-purpose machines.
- Proven autonomy, rigor, and strong interpersonal skills.
- Fluency in English (spoken and written); capable of leading meetings and producing clear technical documentation.
- French is a plus.

The Bertrandt Group has been providing solutions for research and development for the international automotive industry

for over 40 years. From the incipient phase to the production phase, our company implements the ideas in services, accompanies and supports the peripheral fields of the companies in the construction industry of machines and installations, in the electrotechnical industry, energy as well as the medical industry.

As one of the top employers, we are also one of the preferred addresses for applicants. Providing careers for motivated engineers who are prepared to give their best.
