

# Project Leader hardware & testing

**Workplace:** 418 32, Gothenburg

Apply online!

## What to expect:

### Strategic Planning & Execution

- Lead the planning, coordination, and ramp-up of HIL (Hardware-in-the-Loop) test objects across multiple car programs.
- Collect, analyze, and consolidate requirements from developers, testers, and key stakeholders to define test object needs.
- Develop and maintain a structured roadmap for test object availability, ensuring alignment with program timelines, technical prerequisites, and verification strategies.

### Stakeholder Collaboration & Communication

- Serve as the central point of contact for all matters related to test object planning and readiness.
- Provide clear and timely communication on status, risks, dependencies, and changes to all relevant stakeholders.
- Prepare and present ramp-up plans, reports, and roadmaps in a clear and compelling manner.
- Collaborate closely with engineering teams, procurement, and external suppliers to secure timely and cost-efficient delivery of test objects.

### Cost Optimization & Procurement

## What you bring along:

- Strong experience in project management, ideally within hardware, testing, or engineering environments.
- Demonstrated ability to drive structured planning and execute complex projects involving cross-functional teams.
- Excellent communication and visualization skills, with the ability to present plans and insights clearly to diverse stakeholders.
- A strategic mindset with a strong focus on cost efficiency, long-term planning, and operational optimization.
- Proven capability in coordinating procurement, logistics, and supplier interactions to meet project demands.
- Technical understanding of Hardware-in-the-Loop (HIL) systems or similar test environments is considered a strong advantage.
- Advanced English skills.

- Drive strategic decision-making to optimize investments in test objects while ensuring capability and quality requirements are met.
- Manage budgets, cost forecasts, and financial follow-up related to test object procurement and maintenance.
- Identify opportunities to reuse, repurpose, or extend the lifecycle of existing test objects to reduce cost and improve operational efficiency.

### Process Improvement & Efficiency

- Lead continuous improvement initiatives related to test object planning, procurement, and deployment processes.
- Ensure seamless integration of test objects into existing verification and validation environments.
- Establish and maintain robust documentation, tracking mechanisms, and lifecycle management processes for all test objects.

With more than **54 locations throughout Europe**, the **Bertrandt Group** has been providing **engineering and development solutions** for the international **automotive and aerospace industries** since **1974**. More than **12,000 employees** use their **know-how** and **innovative strength** every day to support our customers – **leading manufacturers and OEMs** – with integrated solutions in **management, design, and industrialization**.

**Bertrandt is now expanding into Sweden**, establishing a **strong and future-oriented presence in Gothenburg**. Our activities cover a **spectrum of expertise** from **electrical, electronics, and software development** to **design engineering, project management, quality, industrialization, and validation**, all driven by **innovation** and a **passion for technology**

Gothenburg location and candidates must hold valid work authorization in Sweden.
