

System Engineer Team Lead

Workplace: 550025, Sibiu

Apply online!

What to expect:

- Team management and coordination: planning, organizing and monitoring the work of the SE team.
- Project management: Ensuring that projects are completed on time and within budget.
- Technical expertise: Applying systems engineering principles and methods.
- Communication: Communicating clearly and effectively with the team, other departments and stakeholders.
- Development and motivation: Encouraging the professional development of team members and creating a positive working environment.
- Quality Assurance: Ensuring that the team's deliverables meet quality standards.

What you bring along:

- German language is a must, English is nice to have.
- Strong understanding of system engineering principles, network architecture, and relevant technologies.
- Proven ability to lead, motivate, and manage a team of engineers.
- Excellent analytical and problem-solving skills to address complex technical challenges.
- Strong written and verbal communication skills to effectively communicate with team members, stakeholders, and other teams.
- Experience in managing projects, including planning, scheduling, and resource allocation.
- Ability to work effectively with cross-functional teams and build strong working relationships.

We are Bertrandt: an independent, international development service provider with long years of automotive expertise.

We create technological solutions for our customers at any stage of the product development process with a focus on hot topics such as digitalization, e-mobility and autonomous systems, largely for the automotive, aerospace and mechanical engineering sectors.

Our goal: accelerating technological progress. We work on this every day – with around 12,000 employees at over 50 sites worldwide.
