

Data Engineer - Aerospace field

Workplace: 28906, Getafe

[Apply online!](#)

What to expect:

We are looking for an engineer who will be responsible for generating the database applicable for EFA, MRTT, A400M Generation and/or Retrofit, collecting data from several sources (for instance maintenance, materials, configuration) according to customer's needs.

The position will be based at the client's facilities in Getafe (remote work is not possible).

Main responsibilities:

- **Data Compilation and Management:** Collect and compile essential aircraft data from various sources, ensuring the information aligns with the client's operational needs and technical requirements.
- **Database Generation:** Develop and maintain a detailed, accurate, and structured database, applicable to the client's aircraft and adaptable to updates in maintenance, material, and configuration information.
- **Data Verification:** Conduct thorough verification processes on the compiled data, ensuring the integrity, accuracy, and consistency of the database by using specialized tools.
- Automating data processing tools to improve

What you bring along:

- Degree in Computer Engineering, Aerospace Engineering, or a related field (other backgrounds with relevant experience in data management will also be considered).
- At least 2 years of professional experience.
- Previous experience in the aerospace sector working with data will be highly valued.
- Previous hands-on experience with Excel/VBA and/or SQL will be highly valued.
- A proactive team player with strong attention to detail.

efficiency.

We are Bertrandt.

An independent and international development service provider with long years of automotive expertise. With cross-industry know-how and a holistic understanding of systems and products, we create technological solutions at any stage of the product development process. We deal with a focus on hot topics such as digitalization, e-mobility and autonomous systems, mainly for the automotive, aerospace and mechanical engineering sectors, and consistently facilitate the development of tailored solutions in these areas. Our goal: to accelerate technological progress and make a relevant contribution to a sustainable future. We work on this every day - with around 14,000 employees at more than 50 sites worldwide.
