

## Junior Maintenance Technician - Wind & Solar (m/f/d)

**Workplace:** 80000, Amiens

[Apply online!](#)

### What to expect:

- Support all on-site and off-site maintenance activities (warehouse, offices, etc.) to ensure the availability of land-based assets according to legal and internal regulations
- Work within an autonomous maintenance team under the supervision of the French Maintenance Manager
- Assist with planned maintenance, inspections, and safety procedures following company standards
- Participate in troubleshooting and corrective maintenance activities, both minor and major, in collaboration with internal teams or subcontractors
- Support smooth operations of the service center, including preparation and organization of maintenance activities
- Communicate relevant information to the Asset Management team (e.g., turbine failures, planned maintenance)
- Ensure tools, equipment, spare parts, and consumables are in good condition, inspected, and available in sufficient quantity

### What you bring along:

- High school diploma, **BTS, DUT**, or equivalent in industrial maintenance, electromechanical systems, electrical engineering, or related field
- Certification or professional qualification in technical maintenance or **wind turbine maintenance** (e.g., **BZEE**)
- Specific training or certifications: **GWO BST** + French electrical certificate (**habilitation électrique**)
- Minimum **5–7 years of experience** in industrial maintenance (mechanical, electrical, or automation), including **2–3 years in wind or solar PV**
- **Language skills:** fluent French (C1 minimum) and intermediate to fluent English
- Valid driving license

If you are passionate about renewable energy, enjoy hands-on technical work, and thrive in a collaborative environment, we look forward to receiving your application
