

Frontend developer (m/w/d) in the automotive sector

Workplace: 70173, Stuttgart

Apply online!

What to expect:

- **Practice cooperation:** As part of an agile team, you will be responsible for requirements analysis, solution design, and frontend system implementation in constant consultation with our customers
- **Drive development:** You oversee the development of modern and complex web applications
- **Maintain an overview:** You are responsible for the entire process from concept development to testing and go-live

What you bring along:

- You have a **degree** in the field of IT / Software Engineering or **relevant professional experience**
- You have gained experience with **JavaScript frameworks** such as React, Vue, Angular, Spring Boot in the context of your own projects
- In your work, you focus on **user-friendly applications** and always follow **clean code principles**
- Your language skills are not limited to German and English, but are also fluent in **programming** with JavaScript, CSS or HTML
- As a team player with an **agile mindset**, you enjoy working in a cross-functional environment

You are eager for a new challenge and want to prove your talents in an innovative environment? As part of a project for a well-known customer in the automotive industry, we are looking for you to work in a dynamic environment on sophisticated solutions for the vehicles of tomorrow. In addition to working on promising topics within our open corporate culture, Bertrandt offers the necessary freedom to shape your own personal career.

Individuals with severe disabilities or those considered equal to them under the German Social Code, Book IX (SGB IX), will be given preferential consideration for employment if they have equal qualifications.
