

Aerospace engineer - Configuration Control

Workplace: 28909, Getafe

[Apply online!](#)

What to expect:

We are searching for an **Aerospace Engineer** to join one of our projects in the aerospace sector, supporting the Programs organization. The selected candidate will be responsible for analyzing aircraft modifications, identifying impacts across service areas, and coordinating the preparation of cost proposals. The role involves technical evaluation, documentation management, and cross-functional coordination with engineering and service teams.

General responsibilities:

- Manage and evaluate all modifications applied to the aircraft throughout the project.
- Identify the service areas affected by each change and ensure proper coordination.
- Analyze, classify, and categorize **concessions** (defects identified before aircraft delivery) according to their impact.
- Ensure proper traceability and maintain accurate

What you bring along:

- Degree in Aerospace, Industrial, Mechanical Engineering or similar.
- Ability to analyze technical changes and understand the impact on different service areas.
- Strong organizational skills and attention to detail for managing documentation and traceability.
- Analytical mindset for evaluating costs, requirements, and offer conditions.
- Good communication skills and ability to collaborate with multidisciplinary teams.
- Motivation to grow within an engineering and program-oriented environment.

What we offer:

- Flexible working hours to support work-life balance.
- Competitive compensation package.
- Continuous training and professional development opportunities.
- A collaborative and team-oriented work environment.

technical documentation for each modification and concession.

- Request quotations from the service areas involved in each modification or concession.
- Analyze the criteria and conditions of each offer, including technical, economic, and schedule aspects.
- Prepare the consolidated cost template, ensuring accuracy and consistency prior to submission to the Programs organization.
- Coordinate and follow up with technical teams to ensure that offers meet requirements and deadlines.

We are Bertrandt

We are an independent, international development service provider with many years of experience in the automotive sector. Thanks to our cross-industry expertise and comprehensive understanding of systems and products, we create technological solutions at any stage of the product development process.

We focus on key areas such as digitalization, electromobility, and autonomous systems—mainly within the automotive, aerospace, and mechanical engineering sectors—continuously enabling the development of customized solutions in these fields.

Our goal is to accelerate technological progress and make a meaningful contribution to a sustainable future. We work toward this every day with around 14,000 employees across more than 50 locations worldwide.
