

Python Software Developer

Workplace: 061331, Bucharest

Apply online!

What to expect:

- Develop applications using the **Python** programming language, with **OOP** features
- Model-Based Development: **Matlab, Simulink**
- Version Control & **CI/CD: Git, Jenkins**
- Proven experience in **Automotive Software development**
- SW-Testing : Experience in writing Unit tests, integration tests, and focused on writing robust tests that can be automated
- Strong knowledge of pandas for data analysis and manipulation
- Experience with libraries such as TensorFlow, Matplotlib, Django/Flask and PyTorch is nice to have. **
- Participate in all phases of the software development life cycle, including testing and deployment
- Collaborate with other members of the development teams, as well as clients, to ensure that the applications meet specification effectively
- German language is a plus

What you bring along:

- **Patience & Problem-Solving:** The project is large and complex, with existing technical debt requiring structured and methodical work
- **Desire and ability to refactor code** in an existing code base during ongoing development of features
- Proficiency in Python programming
- Strong knowledge and experience with NumPy and pandas
- Experience with additional libraries such as TensorFlow, Matplotlib, Django/Flask, and PyTorch is an advantage
- Knowledge of the German language is a plus
- Excellent communication skills and ability to work collaboratively within a team
- Strong problem-solving skills and attention to detail
