Function Owner – Automotive Audio Specialist:
- Lead the functional development of the vehicle's audio system, from requirements definition to final validation.
- Ensure audio quality, system tuning, and coherent integration of all components (speakers, amplifiers, DSPs, audio sources).
- Coordinate the functional design with other technical areas such as HMI, UX, and E/E architecture.
Project & Resource Management:
- Plan and track technical milestones related to audio within the vehicle development cycle (from concept phase to SOP).
- Coordinate human and technical resources, ensuring the availability of equipment, labs, and personnel for testing and tuning activities.
Test & Validation Management:

What you bring along:

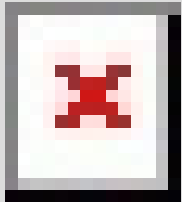

- Technical diploma in acoustics or similar.
- Deep knowledge of:
- Audio DSP and signal processing.
- Audio coding and transport (A2B, MOST, Ethernet AVB).
- Diagnostic protocols (CAN, LIN) and E/E architecture.
- Strong communication, technical leadership, and teamwork skills.
- English is mandatory

- Define and implement test strategies for the audio system: acoustic performance, robustness, interoperability (Bluetooth, CarPlay, Android Auto), synchronization.
- Manage and resolve system issues during integration phases, ensuring documentation, reporting and internal quality standards
