

# Embedded Software Engineer - Automotive

**Workplace:** 418 32, Gothenburg

[Apply online!](#)

## What to expect:

- Develop, integrate, and maintain embedded automotive software
- Work with embedded platforms, ECUs, and related software components
- Support system integration, testing, and troubleshooting activities
- Collaborate with system, test, and verification teams
- Contribute to software releases and continuous improvements
- Work according to automotive development standards and processes

## What you bring along:

- Experience as a Software Engineer within automotive or embedded systems
- Programming experience in C, C++, Matlab/Simulink, Python, or similar
- Understanding of software development lifecycles
- Structured and quality-oriented working style
- Ability to collaborate in cross-functional teams
- Fluent in English and Swedish
- Valid work permit for Sweden

## About the role

As an Embedded Software Engineer, you will work with development, integration, and maintenance of software solutions for modern automotive systems. The role covers embedded platforms across different vehicle domains and supports both new development and series production projects.

*This is a general role intended to cover a broad range of embedded software profiles within automotive engineering.*

With more than **54 locations throughout Europe**, the **Bertrandt Group** has been providing **engineering and development solutions** for the international **automotive and aerospace industries** since **1974**. More than **12,000 employees** use their **know-how** and **innovative strength** every day to support our customers – **leading manufacturers and OEMs** – with

integrated solutions in **management, design, and industrialization**.

**Bertrandt is now expanding into Sweden**, establishing a **strong and future-oriented presence in Gothenburg**. Our activities cover a **spectrum of expertise** from **electrical, electronics, and software development** to **design engineering, project management, quality, industrialization, and validation**, all driven by **innovation** and a **passion for technology**.
